Mini Series Self Priming Regenerative Pumps - Premium Series

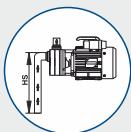

Stainless Steel Insert SS-304

Provided Stainless Steel insert for corrosion free & stuck free operation

Robust & Sturdy Design

Offers rust free & stuck free operation

High Suction Capacity

Instant suction, Up to 8.0 meters suction lift

High Grade Electrical Stamping

Reduces electrical losses & improves pump efficiency

High Grade Brass Impeller

High quality forged brass impeller for longer life

Easy for Maintenance

Simple construction, easily replaceable wear & tear parts

F Class Insulation

High grade F class insulation paper used for higher reliability

IP 55 Protection

High Protection from water splashing & solid particle

FEATURES

- Rust proof CED Coated Hydraulic Parts.
- Low Noise.
- Thermal Overload Protector (TOP) Safe Guard Motor From Overheating / Burning.
- Optimum Performance With Wide Voltage Range.
- Integrated with High Performance Bearings For Smooth Operation.

APPLICATION

Row
Houses

Small
Buildings

Drinking
Water Supply

Fountain
Garden
